

The Climate-Resilient Gardener

Heat waves. Late frosts. Drought. Floods. New pest pressures. There are a lot of new and worsening environmental conditions that are putting humanity's ability to feed itself at risk.

We'll work with your goals and your space to help you design a more climate-resilient garden that grows food AND heals the Earth.

PACKAGE INCLUDES:

SITE VISIT

- 30-minute virtual tour of your space
- 30-minute interview about the nuances of your space and your goals

RESILIENCY PLAN

- Recommendations for added resiliency given your goals and space
- Covers infrastructure, soil health, plant list, and more

Your plan will include the following areas of recommendations catered to your space and your goals.

- Water conservation
- Soil health (e.g., mulching, erosion prevention, composting)
- Infrastructure such as shade cloth and irrigation
- Ways to incorporate native plants in your growing space
- Other tips for supporting the ecosystem while growing food

Package Cost

\$150. Includes an hour of direct consultation in your space and a written, detailed resiliency plan that fits your space and your goals.
